## TG9 Series | Switches Sockets and Accessories Product Information and Price List

A range that redefines luxury

Switches designed for aesthetics & performance

TG9 Series is a modular product range which is designed to satisfy the requirements of electrical installations in modern buildings. The range includes switches, sockets, fan regulators & dimmers, hospitality products, acoustic and optical signalling products, cover plates in various materials etc.

Modules such as switches, sockets etc. are made to a standard size (module) and are mounted on frames. Front plates can be changed at any time without disturbing the wiring - in order to adapt to changes in the building interiors.

TG9 Series switches have contacts which provide very high current carrying capacity. The contact design, snap action mechanism, appropriate contact pressure, wiping action between the contacts and use of high engineering grade materials result in minimum arcing. Reduction in arcing ensures a long operating life for switches.

Switches with solid metal levers

Metal and plastic options

LED indicators used in TG9 Series switches emit a soft, reassuring glow which is mild and soothing to the eyes. Use of high quality LEDs ensures a long life without flicker. Norisys engineers have been working diligently day after day in order to ensure consistent electrical, mechanical and thermal qualities in TG9 Series products in addition to aesthetics.

Smooth Operation

Mechanism designed for flawless movement

The transfer of motion from the dolly to the mechanism inside has been completely restructured. The front metal dolly is shielded from the live parts by a plastic component that is solidly riveted to it, thus providing adequate insulation. This plastic part also gives the

dolly the required cushioning for a smooth movement. The geometry of the spring in the contact mechanism is designed in a way so as to reduce the wear while switching even in arduous conditions.

An increase in the quantity of silver in the contacts also helps in reducing the electric arc considerably, thereby ensuring a trouble-free long life for the mechanism. Smoothness of operation imparts the luxury feel to the product. A soft click is all it takes to switch a light on.

Norisys TG9 Series plates set the standard for stylish design. They are available in top quality materials: Solid Aluminum, Solid Glass, Solid Wood, Solid Marble finish. The classy design creates an exclusive flair owing to the interaction of contrasts between the severity of optical forms and surface finish.

Each piece of Solid Aluminum plate is machined out of a solid block of aluminum to give it the sharp and clean look. These plates are available in natural, black and dark bronze colours that match very well with the modules. The complete look is a solid, well engineered and a smart composition.

TG9 Series products are designed for durability and flawless performance even in arduous conditions. The products are mounted in a way that the entire pressure of wires in the junction box is borne entirely by a sturdy bi-material frame.

The bi-material support frames in TG9 Series is the result of several man-hours of research and development.

Bi-material frames are a combination of steel and engineering grade plastic. Cover plates have different combinations of holes and windows. Holes are meant for switches and fan regulators, while the windows are meant for all other modules.

Solid Glass Plates with frames

Various colour options

Solid glass plates are made of engineered glass which is tempered and toughened to make it rugged and to impart a nice uniform lustre. Solid glass plates are available in Ice White, Metal Gray, Smoked Silver, Solid Black and Ultra White colours. Minimalistic design with various optical forms in glass plates and metallic switches makes them an aesthetic treat to the eyes.

Modules are mounted on bi-material frames using a unique snap-fit mechanism. This snap-fit mechanism is highly accurate thereby ensuring that all modules fit comfortably without the need of force. Location of the modules on the bi-material frames is controlled by this mechanism and it maintains uniform gaps between the modules. It uses locks that remain free from any stress after mounting.

**Sustainable Materials Advantage**

Materials chosen for functionality and sustainability

Materials chosen for TG9 series products reflect the Core values of Norisys that guide everything we do as a company and strongly influences the decisions our employees make at work. It is our long standing commitment and it exemplifies the way we operate. These values are timeless and foundational for a sustainable strategy that positions Norisys for long-term growth and strengthens our connection within local communities.

We are committed to protecting the health and safety of the people connected with us in any way - our employees, our contractors, our customers, and the people in the communities where we operate. We search for

science-enabled, sustainable solutions for our customers and always strive to manage businesses while protecting the environment and preserving the earth's natural resources — for today and for future generations.

At Norisys, we regularly engage in multiple sustainability initiatives. We are working towards minimal waste in our operations — not only inside the four walls of the plants, but also across the complete lifecycle of the products we make.

### Bi-material Frames Advantage

Frames that are designed for tough performance

TG9 Series products are designed for tough performance. The products are mounted in a way that the entire pressure of wires in the junction box is borne entirely by a sturdy bi-material frame. The bi-material support frames in TG9 Series is the result of several man-hours of research and development. The bi-material frames are made of a combination of steel and

engineering grade plastic. In this design, the steel structure is embedded into plastic. The steel inside gives the bi-material frame a rigid structure while the plastic provides the anti-rust and insulation properties. Modules are mounted using a unique snap-fit mechanism.

The snap-fit mechanism is highly accurate, thereby ensuring comfortable fitment of all modules without the need for excessive force. Location of the modules on the frames is controlled by this mechanism which maintains uniform gaps between the modules. This mechanism uses interlocking that remains free from any stress.

Solid Marble Finish  
Onyx White

Solid Marble finish plates are individually machined from solid blocks so that the end product is a crisp clean-cut flat plate that bears modern aesthetics. The Sparkle White and Salt White options match very well with white stones whereas the Onyx White and Terra Beige options

match very well with stones from the Beige and Brown family. Once mounted along with the TG9 Series modules, it creates a confluence of technical accuracy with a natural feel.

Norisys TG9 Series plates set the standard for stylish design. They are available in top quality materials: Solid Aluminum, Solid Glass, Solid Wood, Solid Marble finish. The classy design creates an exclusive flair owing to the interaction of contrasts between the severity of optical forms and surface finish.

Each piece of Solid Marble Finish Plate is machined out of a solid block of composite to give it the sharp and clean look. These plates are available in Sparkle White, Terra Beige, Salt White and Onyx White colours that match very well with modules. The final composition after mounting looks well engineered and smart.

**Electrical safety advantage**  
 Unique ring-shaped springs in sockets

Norisys engineers developed a unique ring-shaped spring which solves the frequently occurring problem of burnouts in power sockets. Norisys sockets feature this ring-shaped spring which maintains a uniform pressure on the brass contact tubes. This pressure clamps the plug pins tightly leading to a spark-free

contact, thus eliminating overheating and consequential burnouts. Norisys sockets are designed for extreme endurance. Materials are chosen to withstand arduous conditions. Local wiring practices are carefully studied before designing any new product.

**Thermoset material advantage**

Use of material that does not melt on heating

Use of engineering grade thermoset material in TG9 Series products makes the range extremely strong and sturdy with flame proof qualities. The engineering grade thermoset material used in the products has excellent electrical insulation properties and does not melt

upon heating. This ensures that the products are capable of handling higher operating temperatures. This engineering grade thermoset material is conventionally used in industrial applications where a high degree of electrical insulation is required.

	Step Marker Lamp/ Night Lamp 2 Module	Quartz Gray	T5721 .02	760.00
	Electronic Bell 2 Module	Quartz Gray	T5707 .02	749.00

Products like Speakers for Audio Music, Night Lights with Dimming Option, Step Marker Lamps, Prismatic Overdoor Bulkhead Indicators etc. when mounted with modular switches provide the necessary convenience in modern buildings apart from adding to the style quotient. These installations not only look

good, but are also ideally convenient to operate. These products are all mounted on bi-material support frames in TG9 Series. The bi-material frames are made of a combination of steel and engineering grade plastic. In this design, a steel structure is embedded into the plastic to ensure adequate support.

Norisys has a full fledged, well equipped research and development division which works constantly to improve, innovate and engineer new products. This research and development division has a fully integrated product development environment that directs the development process throughout, right from concept design to manufacturing.

Acoustic & Optical Signaling

Quartz Gray

				Price Rs.
	Speaker for audio music circuit 2 Module	Quartz Gray	T5706 .02	1320.00
	Night Light with switch and dimming option - 2 Module	Quartz Gray	T5716 .02	1153.00
	Ultrasonic Mosquito Repellent 2 Module	Quartz Gray	T5708 .02	1071.00

TG9 Series installations do not only look good, they are also extremely convenient to operate. This quality is especially required in hotels and hospitals where one seeks quiet and wellbeing. In such environments, it is important to have fittings that stand for good feeling. Products like Shaver Sockets, Key Card Switches, Call bell systems with register, Buzzers, Speakers for Music circuits, Step Marker Night Lights, Do Not Disturb and Clean

My Room dedicated switches, Bell Switch with DND & Clean My Room connections provide the necessary convenience for guests in hotels. Plates merge with the building interiors very well, thereby creating a homogeneous look. Inner bi-material frames give adequate support to the plates, thereby keeping all the modules securely in place.

	Shaver Socket 220V/110V 3 Module	Quartz Gray	T5723 .02	2722.00

Architecture of modern hotels and hospitals makes the highest demand for design and function of electrical installations. Norisys offers high-end products suited for the hospitality industry. Good quality card operated switches are a prerequisite in all hotels these days for energy saving. With this in mind, Norisys offers a reliable solution for all hotels.

Communicate and Support Modules from Norisys have been developed to establish new standards in electrical accessories. Commitment to superior designs, elaborate attention to engineering details, modern manufacturing facilities and stringent quality measures have combined together to create a new concept in safety, reliability, flexibility and modernity.

Norisys has a full fledged, well equipped research and development division which works constantly to improve, innovate and engineer new products. This research and development division has a fully integrated product development environment that directs the development process throughout.

TG9 Series marks the evolution of Norisys' research as it once again focuses on engineering design, especially its environmental qualities & pivots on the concept of variability and sustainability, performance and simplicity of use. It is a new way of creating environments, made possible by the types of products that have been developed, namely by using advanced materials and engineering. The result is an installation system that blends seamlessly with the building.

A professional of electrical switchgear, Norisys today constructs innovative switchgear systems at the highest level and has established and by many years of experience and high quality workmanship. TG9 Series is the best example of the same.
